Site: bassetlaw

Site auto-detected from a known-places directory match: No postcode was written in the document; 'Bassetlaw District Council' (found in the document) matched the known-places directory (DN22 7QY, source: lpa-centroid).

Generated 2026-09-28

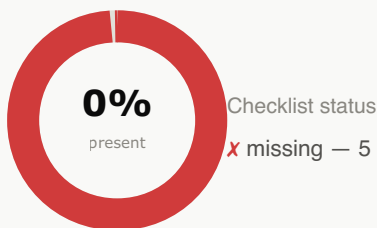

This is an automated first-pass check against the indexed corpus and the site's GIS-matched constraints - not professional planning or legal advice. It can only flag what the corpus and constraints actually cover, and it can still miss things or misjudge relevance. Treat each issue as something to verify, not a final answer, and have a qualified planning consultant or solicitor review anything before it is submitted or relied on.

CONTENTS Overview Summary Issues Checklist Images Evidence

Overview

Overall attention needed: High
5 required item(s) missing, 0 unclear, 5 issue(s) flagged

5 Issues flagged	0 Required items present	5 Required items missing	0 Required items unclear
----------------------------	------------------------------------	------------------------------------	------------------------------------

TOPICS CHECKED

- design, scale and massing
- housing and land use policy
- parking, access and highways
- fire safety and building regulations
- required content and mandatory sections of a planning application, design and access statement, or supporting documents

Note: Proposal text was truncated to fit the assessment call.

Note: 3 of 5 document excerpt(s) could not be assessed and were skipped: the model did not return a parseable result for one excerpt of the document (finish_reason='stop') - most likely it used its whole token budget on internal reasoning

before writing an answer; the model did not return a parseable result for one excerpt of the document (finish_reason='length') - most likely it used its whole token budget on internal reasoning before writing an answer; the model did not return a parseable result for one excerpt of the document (finish_reason='stop') - most likely it used its whole token budget on internal reasoning before writing an answer The narrative summary could not be generated, but the issues and checklist below are real, completed results, not a fallback.

ISSUES BY TOPIC

Failure to address fire safe...		1
Failure to address design co...		1
Lack of clarity on landscape...		1
Failure to provide essential...		1
Failure to provide additiona...		1

FAILURE TO ADDRESS FIRE SAFETY REQUIREMENTS

The proposal does not address the fire safety requirements outlined in the Building Regulations 2010 (Parts A-S), specifically Regulation 38, which imposes obligations regarding fire safety information. This is a critical omission as the design and construction of the proposed site must comply with these fire safety standards.

Suggested change:

FAILURE TO ADDRESS DESIGN CONSTRAINTS

The proposal does not explicitly address the design constraints outlined in the Building Regulations 2010 (Parts A-S), such as the requirement for fire safety information to be provided to the responsible person at specific times and the essential information regarding fire safety measures. This omission could result in non-compliance with the building regulations.

Suggested change:

LACK OF CLARITY ON LANDSCAPE INTEGRATION

The proposal does not explicitly address the requirement to integrate the Green Wheel route with the local landscape and natural environment, as outlined in the Building Regulations 2010 (Parts A-S). This omission could result in a design that does not fully respect local biodiversity and environmental considerations.

Suggested change:

FAILURE TO PROVIDE ESSENTIAL FIRE SAFETY INFORMATION

The proposal excerpt does not address the requirement to provide essential fire safety information as per the Building Regulations (Fire Safety) 2010. This includes details such as escape routes, fire doorsets, fire extinguishers, and fire safety strategy.

Suggested change:

FAILURE TO PROVIDE ADDITIONAL FIRE SAFETY INFORMATION FOR COMPLEX BUILDINGS

The proposal excerpt does not include additional fire safety information required for complex buildings, such as detailed fire safety strategies, risk assessments, and procedures for operating fire protection measures.

Suggested change:

Required content checklist (5)

Status	Item	Note	Citations
Xmissing	Fire safety information		[1] [2]
Xmissing	Design constraints from Building Regulations 2010		[1] [2]
Xmissing	Landscape integration		[1] [2]
Xmissing	Provide essential fire safety information		[1] [2]
Xmissing	Provide additional fire safety information for complex buildings		[1] [2]
